

1.09875.0010

Microbiology

Bacillus cereus selective supplement

Contents: 10 vials of lyophilisate for the preparation of 5.0 l
Cereus Selective Agar acc. to MOSSEL (MYP-agar)

Composition (per vial)

Polymixin B 50.000 units

Preparation of Cereus Selective Agar acc. to MOSSEL

1. Suspend 21.5 g in 450 ml of demin. water and autoclave (15 min. at 121 °C).
2. Let the medium cool to 45–50 °C.
3. Dissolve the supplement by adding 1 ml of sterile distilled water and mix homogeneously into the cooled culture medium base. Subsequently add 50 ml of egg yolk emulsion, which has been warmed to room temperature, to the culture medium, distribute homogeneously and pour into plates.
